- www.github.com/faizii-1806

### EDUCATION

- Bachelor of Computer Science & Engineering
- Dhaanish Ahmed Institute Of Technology
- |08/2019 - 06/2023|
- HSC
- Sri Vaiyapuri Vidyalaya Matric Higher
- Secondary School |05/2018 - 03/2019|
- SSLC
- Sri Vaiyapuri Vidyalaya Matric Higher
- Secondary School |05/2016 - 03/2017|

### SKILLS

- HTML
- CSS
- Bootstrap
- Javascript
- Reactjs
- Nodejs
- JQuery
- Angular
- Python(Django)
- GIT
- Typescript
- SCSS
- Mysql

### INTEREST

- Software Development
- Exploring new technologies
- Enhancing communication skills

### WORK EXPERIENCE

- Full Stack Developer
- Emayam Technologies Private Limited
- July 2024-Current
- Worked with back-end developers to design APIs.
- Integrated third-party APIs to enhance functionality and improve overall user experience on web platforms.
- Enhanced user experience by developing and implementing a responsive front-end interface for web applications.
- Built databases and table structures for web applications.
- Reduced page load times by optimizing front-end assets such as JavaScript files, stylesheets, and images.

- Front End Developer
- Yung Media
- 01/2024 - 04/2024
- Yung Media is a dynamic web development agency specializing in creating visually stunning and highly functional websites for a diverse range of clients. Front-End Development: Spearheaded the development of front-end interfaces using HTML, CSS, Bootstrap, JavaScript, jQuery, and Angular, consistently meeting and exceeding client expectations. the HTML and CSS for the email template. This includes writing clean, efficient code, optimizing images, and inline styling to ensure consistent rendering across email clients. Ensure the email template is responsive and displays correctly across various email clients, devices, and screen sizes. Implementing responsive design techniques such as media queries adds complexity.

### PROJECTS

- ZMM (ZeroMiddleman)
- Marketplace for Bulk Sellers and Buyers
- May 2024 - Current
- Developed a marketplace platform enabling bulk sellers and buyers to register, list products, and post quotes. Implemented subscription-based plans to control the number of contacts buyers could purchase and the number of quotes they could view. Created a platform to eliminate intermediaries and allow bulk farmers and producers to sell directly to buyers. Integrated contact selling features to facilitate direct communication between buyers and sellers. Used React.js, Django, REST framework for API integration, and MySQL for data storage. Ensured the platform was scalable, secure, and optimized for high traffic and performance.
- Key Technologies: React.js, Django, REST API, MySQL. .
- FOCULT
- Employee Monitoring App for Desktop Activity Tracking
- Dec 2024 - Current
- Developed an employee monitoring application to track and analyze desktop activities with screen capture capabilities. Streamlined administrative tasks by automating reporting, reducing the weekly administrative workload by 15 hours and enabling managers to focus on strategic priorities. Engineered algorithms for real-time activity tracking, providing actionable insights that were accessed by department leads to drive company-wide productivity. Developed both web and mobile admin dashboards for efficient monitoring and analytics. Used Electron.js to build a cross-platform desktop application for system monitoring. Integrated React.js, Django, and REST framework for seamless API integration with a MySQL database.
- Key Technologies: React.js, Django, REST API, MySQL .
